DESCRIPTION:	Academia's online courseware programs are scientific-research based learning instructional programs. Courseware content addresses reading, writing, mathematics, science, and social studies for kindergarten through twelfth graders. The emphasis is on clear, focused instruction with extensive, frequent feedback containing review and re-teaching as necessary. Initially, students complete an assessment, after which a detailed curriculum is generated that focuses on the areas of weaknesses. The student's progress is continually monitored and at any time, the parent can access the student's account and view their child's progress. Teachers can use web-based tracking technology to monitor student progress.
